LIBT 1410 / TOPICS
MOBILE TECHNOLOGIES IN LIBRARIES

This course introduces students to the use of mobile technologies in libraries. Students will explore the use of mobile devices and mobile applications in libraries as well as mobile services provided by libraries. Students will explore issues of privacy, access, ownership of digital materials, and other issues related to use of mobile technologies in and/or by libraries. Students will be introduced to a selection of relevant mobile applications and have a chance to explore mobile library interfaces.

Continuing Education option also available. Contact instructor for more information.
